TACTICAL POWERGORILLA

MULTI-VOLTAGE CHARGER

CHARGEUR MULTI TENSION | CARGADOR DE MULTIPLE VOLTAJE
CARICABATTERIE VOLTAGGIO MULTIPLO | LADEGERÄT MIT MEHRFACHSPANNUNG | MULTI-VOLTAGE LADER

The Powergorilla laptop charger will give you an extra 2-5 hours of power, depending on your laptop's specification, and over 20 hours on various other electronic devices. It also has a UPS feature when on the 19V setting. The Powergorilla will work with devices up to 24V - so from your laptop, right the way to your smartphone or camera. Just select which voltage you require; 5V, 12V, 16V, 19V, 24V and the LCD screen will indicate which setting has been chosen, then connect your device and start charging. You can even daisy-chain, so whilst the Powergorilla is charging your laptop, you can charge the Powergorilla from the 19V mains power supply or charge your laptop and your smartphone simultaneously.

TACTICAL FALCON 28E

FOLDABLE SOLAR PANEL

PANNEAU SOLAIRE PLIABLE | PANEL SOLAR PLEGABLE | PANNELLO SOLARE PIEGHEVOLE | FALTBARES SOLARPANEL | OPVOUWBAAR ZONNEPANEEL

The Powertraveller Tactical Falcon 28E is a 28W, corrosion resistant, ETFE solar panel with a camo pattern, capable of charging phones and other 5V devices on the go. Two devices can be charged simultaneously, and the screen displays the output amperage so you can easily tell your devices are recharging.

The Tactical Falcon 28E has an IPX6 rating, this means it can withstand water projected in powerful jets, so it can endure a shower of rain, or water splashing, and the ETFE means it can withstand saltwater spray and splashes; ideal for remote locations.

As well as rugged ETFE, the Tactical Falcon 28E also has eyelets so you can hang it up to make the most of the sunlight (or even attach it to a backpack), poppers so it stays closed when not in use, and at 508g it's ultra-lightweight when space and weight is at an optimum.

TACTICAL SOLARGORILLA

MULTI-VOLTAGE SOLAR CHARGER

CHARGEUR SOLAIRE MULTI TENSION | CARGADOR SOLAR DE MULTIPLE VOLTAJE
CARICABATTERIE SOLARE VOLTAGGIO MULTIPLO | SOLAR LADEGERÄT MIT MEHRFACHSPANNUNG | MULTI-VOLTAGE ZONNELADER

The Tactical Solargorilla portable solar charger gives your Powergorilla battery juice anywhere under the sun. It is also a viable charging option for netbooks under 40 watts and it can even charge virtually any 5V device from the USB output.

The Solargorilla works via two PV (photovoltaic) solar panels which generate electric current when they are exposed to sunlight. This allows users the freedom to charge anywhere there is good, strong sunlight, and the technically advanced panels ensure superb power and reliable performance - all housed in a tough outer casing.

This tactical version was designed with military and aid users in mind, in keeping with existing preferred colour schemes and camouflage techniques.

TACTICAL EXTREME

SOLAR KIT

KIT PANNEAU SOLAIRE | KIT PANEL SOLAR | KIT PANNELLO SOLARE | SOLAR PANEL KIT | ZONNEKIT

The new Tactical Extreme aims to further cement the brand's reputation as "charger of choice" in the outdoor, aid and tactical markets. The tactical extreme houses a massive 12,000mAh capacity Lithium Polymer battery and offers users real power in a compact, durable shell. It features a bi-directional USB-C port for both charging a USB-C device and also recharging the unit itself via USB-C, a 12V DC output for charging larger devices such as SLR cameras, heavy duty torches and tablets plus a 5V USB output for smaller devices including smartphones, GoPro, smartwatches and GPS systems.

The Tactical Extreme has been developed in a coyote brown colour, specifically designed for the tactical and military markets when camouflage and blending in is vital.

The rugged, clam-shell design solar panel offers 5 Watt max output, allowing full recharge of the Extreme battery unit within 18-22 hours in optimum light conditions, plus you can use the solar panel to charge 5V devices directly if desired. The Tactical Extreme is IP65 rated - meaning it can withstand water splashes and is dust tight - perfect for military and aid agencies.

OEM CAPABILITIES

Customisation is key in the outdoor market, and our research & development team offers 20 years' experience of delivering bespoke items to both OEM and end-user clients. Many of Powertraveller products are customisable. Being able to fix voltages to any specific requirements of devices to be charged, increasing or decreasing output voltage and amperage. Specific cable assemblies for connection to non standard devices that need charging, as well as complete custom design of enclosures with customer specification. From the packaging to products, Powertraveller can deliver designs unique to your company that match your customers' specific needs. We can even coordinate and execute end-to-end manufacturing and distribution, making Powertraveller a one-stop shop for custom power solutions.

We are always open to new opportunities to expand our product offering into different markets and applications. Talk to your Powertraveller sales representative about developing an existing Powertraveller product, your specific packaging and branding, vision and/or creating a new product to fit your power requirements.

CASE STUDY: AN/PRC-152 RADIO

The Powergorilla houses a 24,000mAh (88VWh) lithium battery which also allows you to charge other devices whilst out in the field. The Powergorilla can be recharged several different ways, including solar charging. Powertraveller solar panels are available separately in various sizes to suit your requirements. When using the Powergorilla in conjunction with the AN/PRC-152 Radio, your battery life can be extended in excess of 48 hours while in single comms use and over 24 hours in a dual comms mode.

VALUE PROPOSITIONS

With an ever-increasing number of mobile devices being taken into regions and environments without mains power, the need for reliable, external battery chargers is paramount. Poor battery functionality can dramatically affect the efficiency of the workforce. According to VDC Research group, when a mobile device fails, it can cost companies and agencies up to 80 minutes of productivity. The award-winning Powertraveller range allows field workers to continue working without interruption, keeping lines of communications open.

- Reliable off-grid power to keep on going
- Rugged, versatile portable chargers
- Relied on by adventure travellers, aid agencies, wildlife conservationists and military organisations
- Deliver power to essential equipment time after time
- Negates the need to carry heavy spare batteries

CASE STUDY: PD-100 BLACK HORNET DRONE

The PD-100 Black Hornet is a very small unmanned air vehicle (UAV) developed by Prox Dynamics. The Black Hornet UAV allows armed troops to spy potential threats. The small, remotely-controlled rotorcraft helps to save the lives of soldiers on the front.

The Tactical Powergorilla can recharge the Black Hornet between 8-10 times, meaning the units can be continuously deployed leaving very little time when they would be non-operational.

The PD-100 Black Hornet is just one example of drone that Powertraveller portable power packs can recharge.
